### Use of Non-GAAP Financial Measures

LeMaitre Vascular management believes that in order to better understand the Company's short-term and long-term financial trends, investors may wish to consider certain non-GAAP financial measures as a supplement to financial performance measures prepared in accordance with GAAP. Non-GAAP financial measures are not based on a comprehensive set of accounting rules or principles and do not have standardized meanings. These non-GAAP measures result from facts and circumstances that may vary in frequency and/or impact on continuing operations. Non-GAAP measures should be considered in addition to, and not as a substitute for, financial performance measures in accordance with GAAP. In addition to the description provided below, reconciliation of GAAP to non-GAAP results is provided in the financial statement tables included in this press release.

In this press release, the Company has reported non-GAAP sales growth percentages after adjusting for the impact of foreign currency exchange, business development transactions, and/or other events as well as EBITDA or earnings before interest, taxes, depreciation and amortization. The Company refers to the calculation of non-GAAP sales percentages as "organic." The Company analyzes non-GAAP sales on a constant currency basis, net of acquisitions and other non-recurring events, and EBITDA to better measure the comparability of results between periods. Because changes in foreign currency exchange rates have a non-operating impact on net sales, and acquisitions, product discontinuations, and other strategic transactions are episodic in nature and are highly variable to the reported sales results, the Company believes that evaluating growth in sales on a constant currency basis net of such transactions provides an additional and meaningful assessment of sales to management. The Company believes that evaluating EBITDA provides an approximation of the cash generating ability of its operations.

The Company has also identified the percentage change in its projected Q2 2019 and full year 2019 operating income and earnings per share excluding "special items." Those special items excluded from Q2 2018 and full year 2018 operating income are the gains on the Company's 2018 acquisitions and divestitures and those special items excluded from projected Q2 2019 and full year 2019 operating income are 2019 restructuring charges. Those special items excluded from Q2 2018 and full year 2018 earnings per share are the gains on the Company's 2018 acquisitions and divestitures, net of tax, and those special items excluded from projected Q2 2019 and full year 2019 earnings per share are 2019 restructuring charges, net of tax. Because acquisitions, divestitures and restructurings are episodic in nature and are highly variable to the Company's results, the Company believes that evaluating its profitability net of such transactions and events provides an additional and meaningful assessment of profitability to management.
