

Conflict Minerals Disclosure

This disclosure for the year ended December 31, 2016 is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 (the “Rule”).

1. Products Overview

LeMaitre Vascular, Inc. (the “Company” or “we”) develops, manufactures, processes and markets medical devices and implants for the treatment of peripheral vascular disease. We evaluated our product lines for the presence of conflict minerals and determined that a limited number contain conflict minerals necessary to the functionality or production of the product as described further below.

2. Reasonable Country of Origin Inquiry (RCOI) and RCOI conclusion:

We conducted a comprehensive analysis of our products subject to the Rule and found that “conflict minerals,” as defined by the SEC*, can be found in isolated components of radiopaque tape, our cholangiogram catheters and our powered phlebectomy devices (the “Products”).

We then identified and contacted the three suppliers that provide the materials used in the isolated components of our radiopaque tape and our cholangiogram catheters and the supplier of our powered phlebectomy devices. The suppliers demonstrated familiarity with the requirements of the Rule and confirmed that they conducted due diligence into their supply chains. We requested that the suppliers provide to us representations regarding the source of the conflict minerals or components containing conflict minerals supplied to us by them. The suppliers made representations to us that the conflict minerals used in the Products were not sourced from the Democratic Republic of the Congo or an adjoining country and/or about compliance with the Rule. We have relied on our supplier’s responses to provide us with information about the conflict minerals contained in the components or Products supplied to us and do not have a basis to believe the representations are untrue.

Based on our evaluation of our Products and the RCOI performed, we have no reason to believe that any conflict minerals necessary for the functionality of the Products may have originated in the Democratic Republic of the Congo or an adjoining country.

* Defined by paragraph (d)(3) of Item 1.01 of Form SD as columbite-tantalite (coltan), cassiterite gold, wolframite, and their derivatives, which are limited to tin, tantalum, tungsten.
